

# Addendum to “FY2024 Statistical Report” Issued January 21, 2025

This addendum provides additional information and an update regarding **Offender Classification** in Section 2: Prisons (page 29) of the *FY2024 Statistical Report*, published in December 2024.

### Reason for the Addendum:

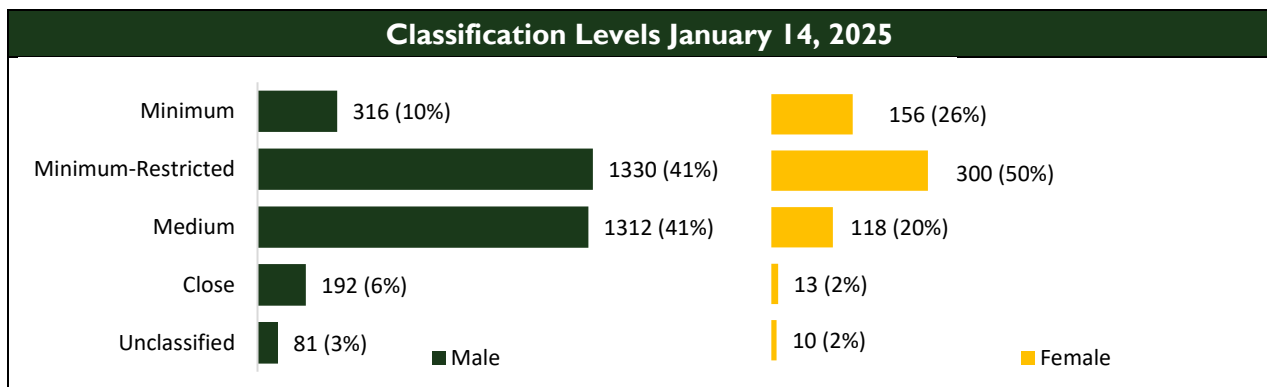

The addendum addresses the implementation of a new classification process that was not complete at the time the original report was published.

### New Information:

In the original report, the South Dakota Department of Corrections committed to providing an updated chart following the implementation of the new classification process. The chart below, reflecting the offender population as of January 14, 2025, categorizes offenders by their assessed and approved classification levels.

For the male population, the largest groups were classified as minimum-restricted (1,330, 41%) and medium (1,312, 41%). In contrast, half of the female offenders were classified as minimum-restricted (300, 50%) as of January 14, 2025.

Offenders listed as unclassified were either in the process of undergoing the admissions and orientation procedures or awaiting approval of their classification assessments as of January 14, 2025.

\* Values may not total 100% due to rounding

### Impact on the Original Report:

The addendum completes the data components of the report.
